

DATA SYSTEMS AND WEB LAB

PROJECT REPORT

TITLE OF THE PROJECT :-

- COVID-19 WEB APPLICATION

GROUP MEMBERS :-

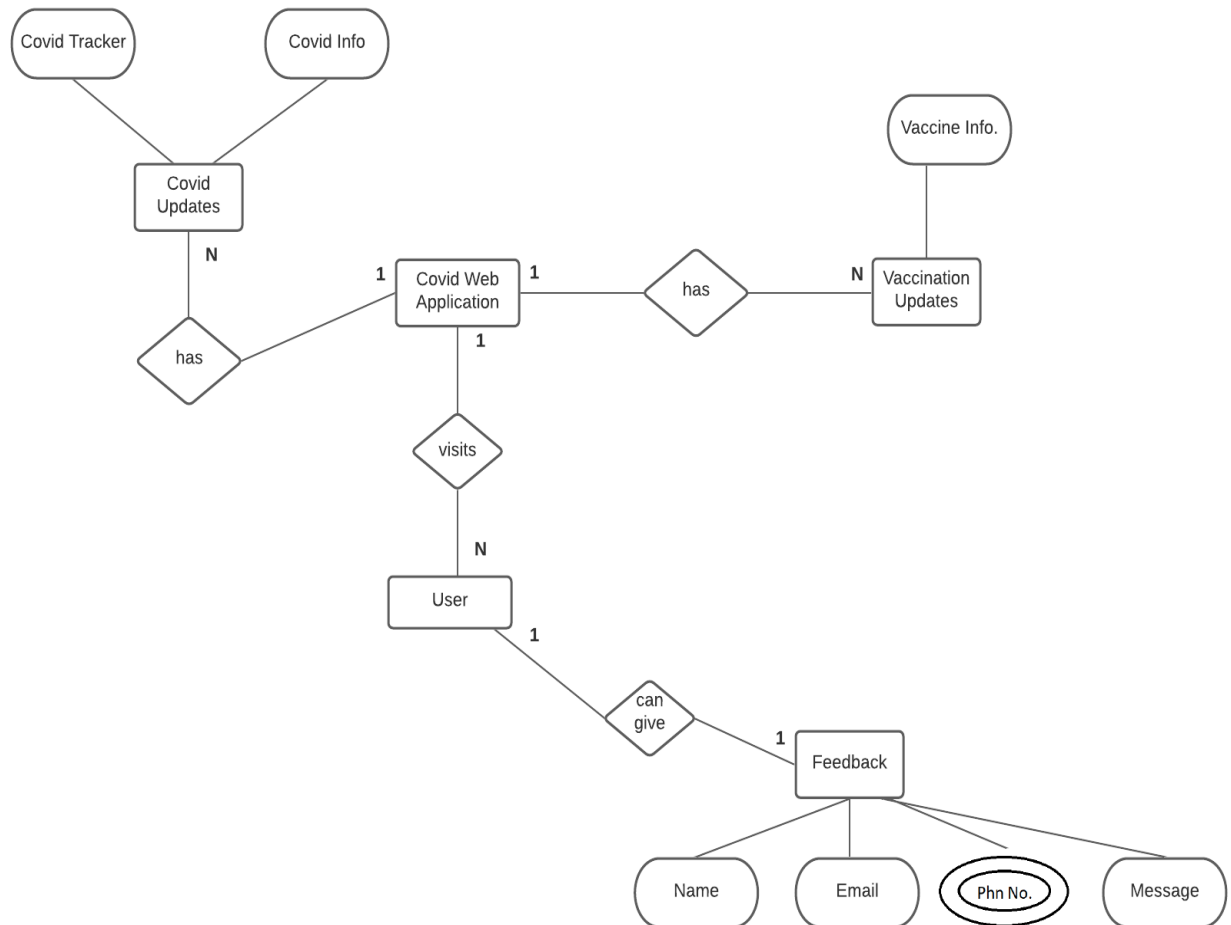

- Ayush Mittal – 20103073 (B3)
- Ishan Chaudhary – 20103059 (B3)
- Siddharth Visen – 20103080 (B3)
- Shivi Mehrotra – 20103064 (B3)

PROJECT DESCRIPTION :-

COVID-19 Web Application aims to provide an easier access for all the updates related to COVID-19 Virus. This application is made using HTML, CSS , JAVACRIPT , PHP along with the database MySQL. With the help of this application ,the user will be able to -

- Track the status of COVID-19 Virus in different states of India and World.
- Learn about COVID-19 Virus and its different variants.
- Learn about the different vaccines used.
- Feedback form for the user.

ER – DIAGRAM :-

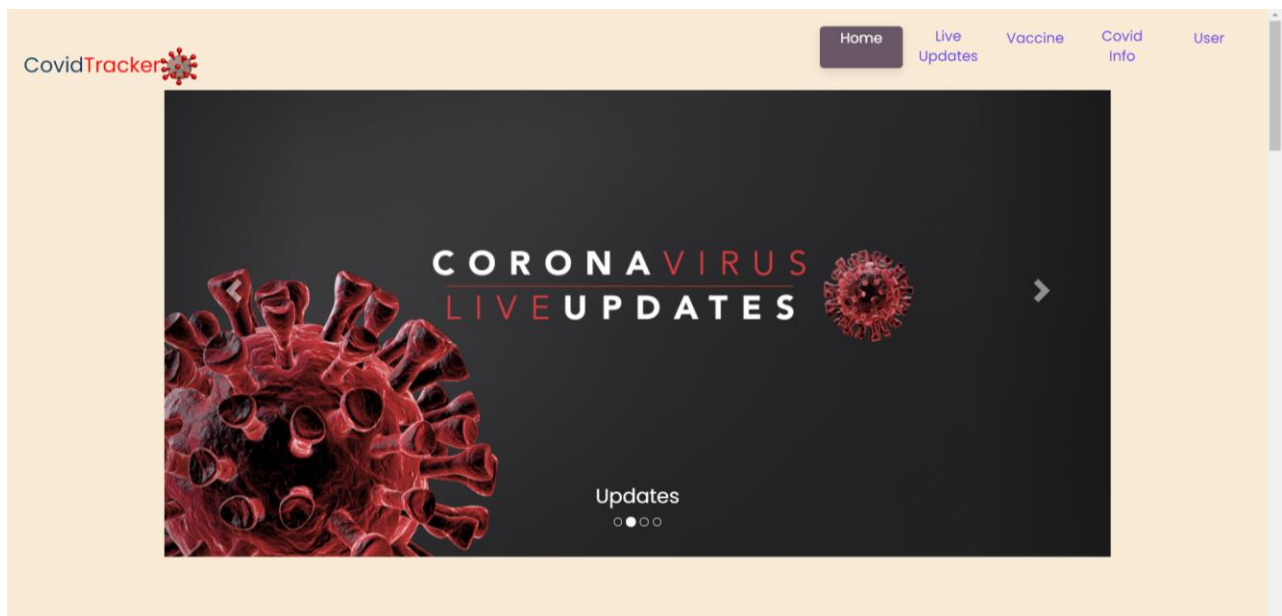

ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my project guide

MR. MAHENDRA KUMAR GURVE SIR who gave us the golden opportunity to do this wonderful project on the topic **COVID-19 WEB APPLICATION**, which also helped us in doing a lot of research and we came to know about so many new things I am really thankful to them.

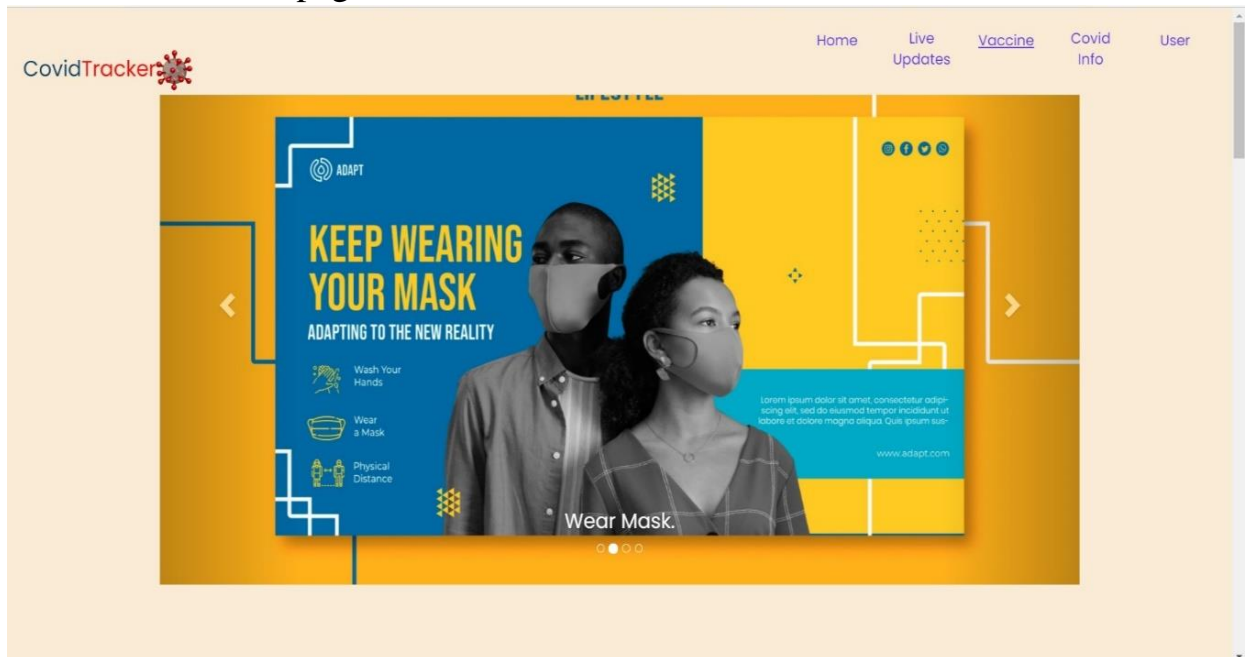

Secondly I would also like to thank my teammates Ayush , Siddharth and Ishan who helped me a lot in finalizing this project within the limited time frame.

RESULTS AND SCREENSHOTS

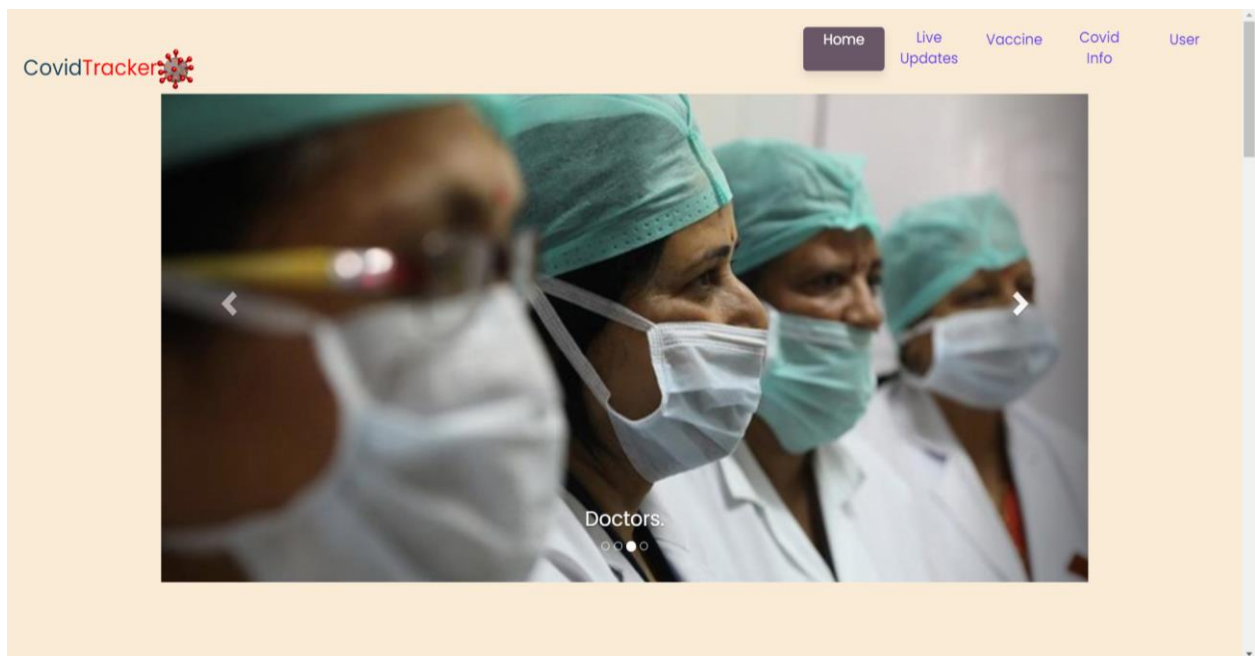

- This is the screenshot of the carousels used in the main page of our project. This is the first picture. There is also a navigation bar on the top of the page

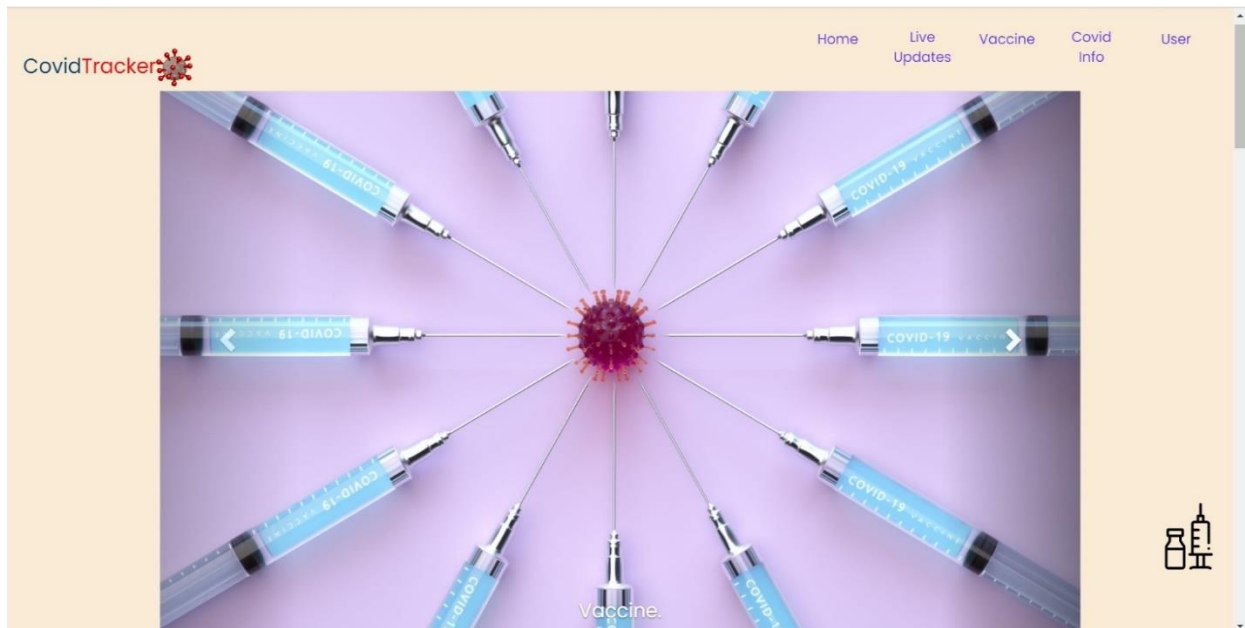

which provides easy access to different pages of our website. Currently we are in the Home page.

- This is the second picture of the carousel.

- Above is the third picture of the carousel.

- This is the fourth picture of the carousel.

- This part of the main page consists of two images of India and the World. These images contain the active hyperlinks to the Covid-19 tracker pages of both India and the World. Here, we are in the Live Updates section of our website.

Statewise Covid-19 Cases In India

State	Confirmed	Recovered	Deceased	Active
Andaman and Nicobar Islands	7549	7419	129	1
Andhra Pradesh	1994606	1963728	13660	17218
Arunachal Pradesh	51513	49425	252	1836
Assam	580657	566101	5502	7707
Bihar	725497	715635	9649	212
Chandigarh	62031	61177	811	43
Chhattisgarh	1003814	989128	13548	1138
Dadra and Nagar Haveli and Daman and Diu	10660	10617	4	8
Delhi	1437118	1411582	25069	467
Goa	172568	168519	3176	873
Gujarat	825196	814934	10078	184
Haryana	770230	759904	9660	666
Himachal Pradesh	210419	204167	3535	2695
Jammu and Kashmir	323499	317872	4398	1229
Jharkhand	347620	342253	5131	236

- When we click on the image of Indian Map. It will direct us to this page which tells us the status of Covid-19 cases in different states of our country. This is an API based webpage whose data is take from an API- <https://data.covid19india.org/data.json>

Covid-19 Tracker

"Prevention is the Cure."
Stay Indoors Stay Safe.

Countries	Confirmed	Deceased
Afghanistan	157585 ↑43	7321
Albania	202863 ↑222	3128
Algeria	212224 ↑177	6126
Andorra	19272 ↑457	133
Angola	65346 ↑14	1736
Antigua and Barbuda	4151	117
Argentina	5350867 ↑2744	116719

- Similarly, when we click on the image of World Map, we are directed to another page which consists the record of Covid-19 cases in different countries of the world. This is also an API based project whose data is take from API- <https://pomber.github.io/covid19/timeseries.json>

ABOUT THE VACCINE.

Covaxin

COVAXIN®, India's Indigenous COVID-19 Vaccine By Bharat Biotech Is Developed In Collaboration With The Indian Council Of Medical Research (ICMR) - National Institute Of Virology (NIV). The Indigenous, Inactivated Vaccine Is Developed And Manufactured In Bharat Biotech's BSL-3 (Bio-Safety Level 3) High Containment Facility. The Vaccine Is Developed Using Whole-Virion Inactivated Vero Cell Derived Platform Technology. Inactivated

Covishield

The Covishield COVID-19 (AZD1222) (C19VAZ) Vaccine, Formerly Known As ChAdOx1 NCoV-19, Is Made From A Virus (ChAdOx1), A Weakened Version Of A Common Cold Virus (Adenovirus). In Addition, Genetic Material Has Been Added To The ChAdOx1 Construct, Which Is Used To Make Proteins From The SARS-CoV-2 Coronavirus Called Spike Glycoprotein (S). Drug Regulators In India Granted Emergency Approval For The Coronavirus Vaccine Co-Developed By AstraZeneca Plc And The University Of Oxford On January 1, 2021. This Vaccine Is The Same Formulation As The Vaxzevria (AZD1222) Vaccine. On February 15, 2021, The World Health Organization (WHO)

- When we click on the Vaccine option the navigation bar , we are directed to a new page as shown above which consists the information about the different Vaccines used in India.

HOW TO PREVENT VIRUS

Wash Your Place

Regular Household Cleaning And Disinfection Products Will Effectively Eliminate The Virus From The Surfaces. For Cleaning And Disinfecting Households With Suspected Or Confirmed COVID-19 Surface Virucidal Disinfectant, Such As 0.05% Sodium Hypochlorite And Products Based On Ethanol Should Be Used

Maintain Social Distance

This Involves Avoiding Public Gatherings, Limiting The Number Of Visitors To Your Home, Staying At Home More Often, Keeping A Safe Distance From Other People And Catching Up With Friends And Family Virtually Instead Of In Person.

Don't Touch Face

Try To Avoid Touching The Eyes, Nose And Mouth, Which Can Be An Effective Way Of Halting The Spread Of Diseases. Viruses Can Live For Days On Surfaces From Desktops To Door Handles, And Once On Our Hands Can Be Transferred Into Our Bodies Through These Entry Points.

Wash Your Hands

To Prevent Contamination, Good Hand Washing Techniques Must Be Practised. Hand Washing Is Also The Least Expensive Measure To Prevent Transmission Of Nosocomial Infections. Hand Washing Is Just One Important Way Of Avoiding Transmission Of Organisms Present On The Hands.

Use Napkins

Napkins Are Clean Substances. These Help To Wipe Your Face And Hands In Case You Have Touched Your Face Or Touched Anything Outdoor. Always Have A Pack Of Napkins.

Wear A Mask

Make Wearing A Mask A Normal Part Of Being Around Other People. The Appropriate Use, Storage And Cleaning Or Disposal Of Masks Are Essential To Make Them As Effective As Possible.

COVID-19 SYMPTOMS

Dry Cough

Sore Throat

Cold

Fever

Headache

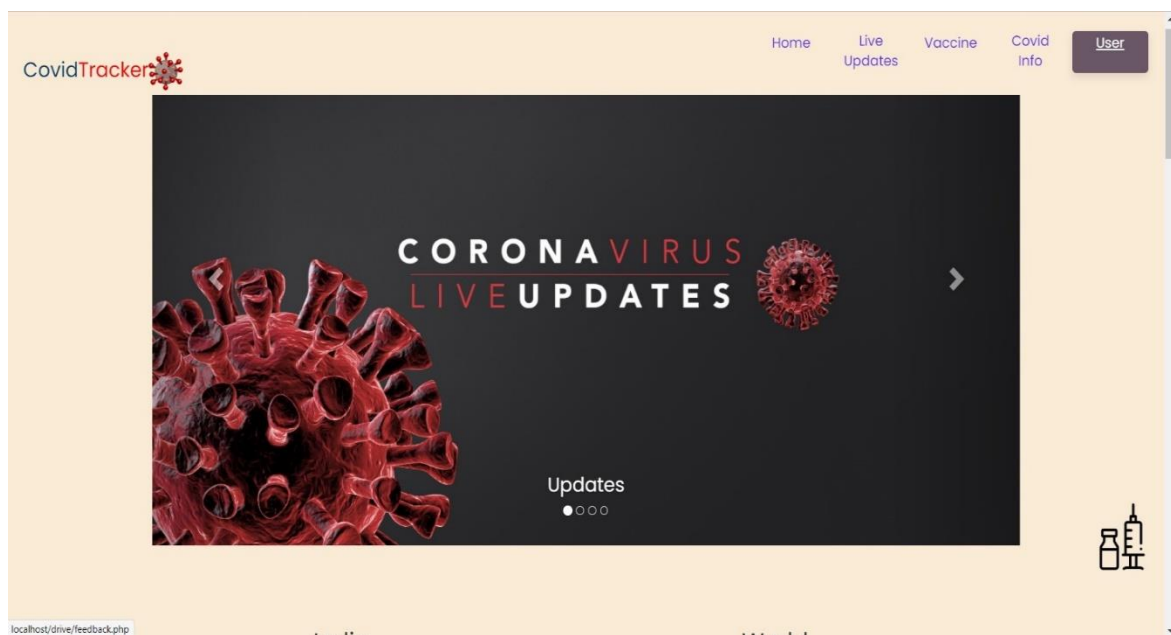

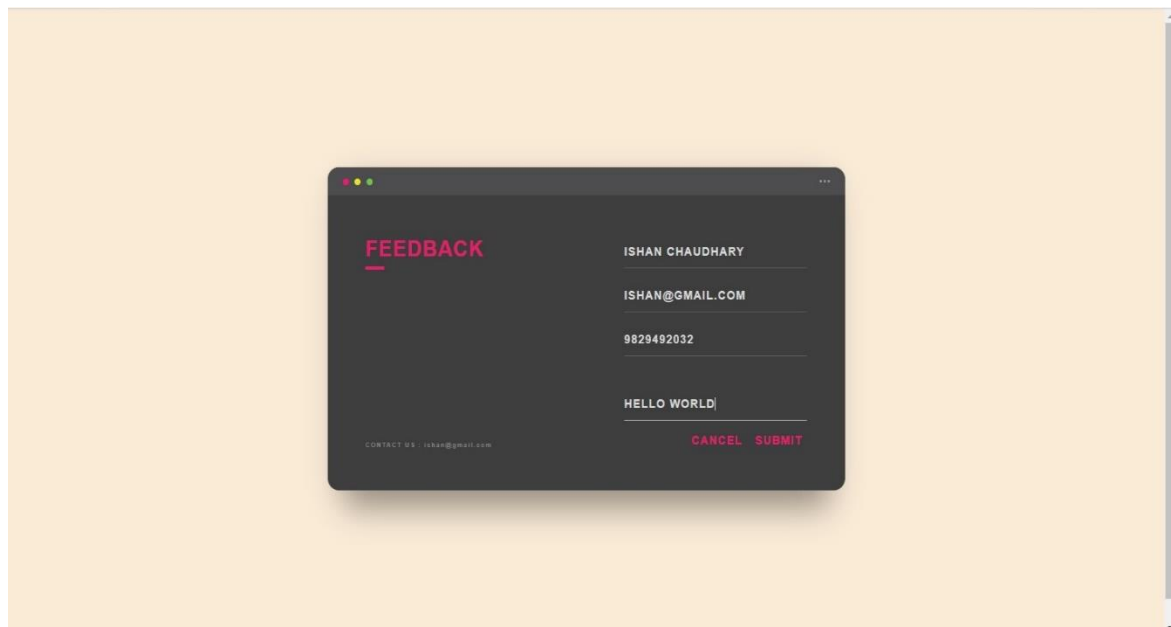

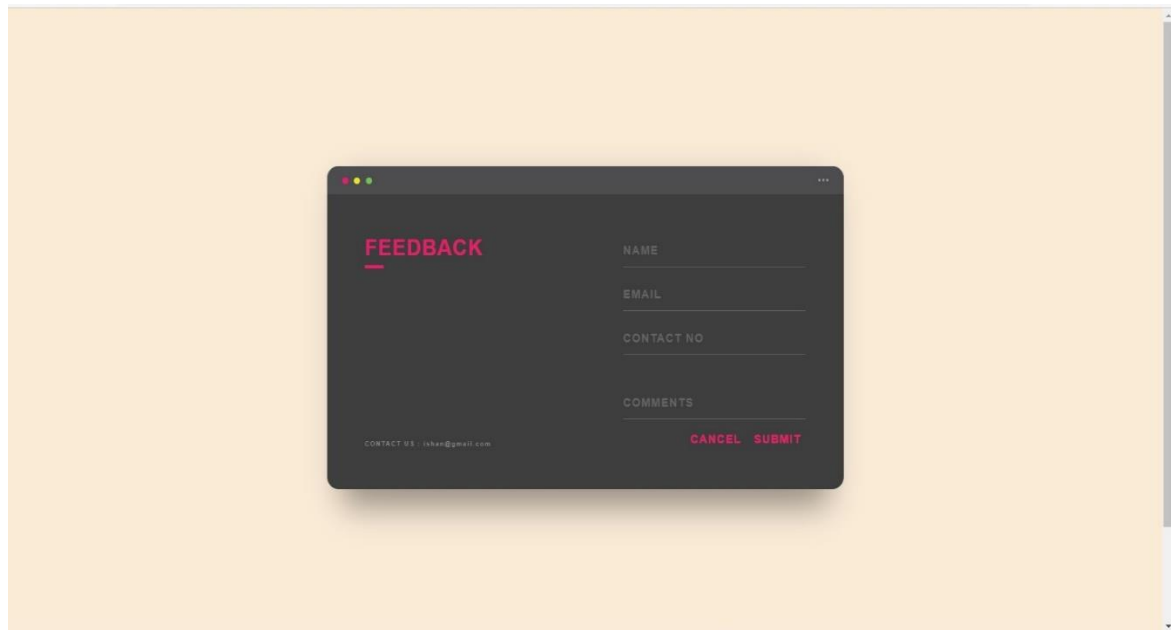

Vomiting

TAKE PRECAUTIONS AGAINST COVID-19

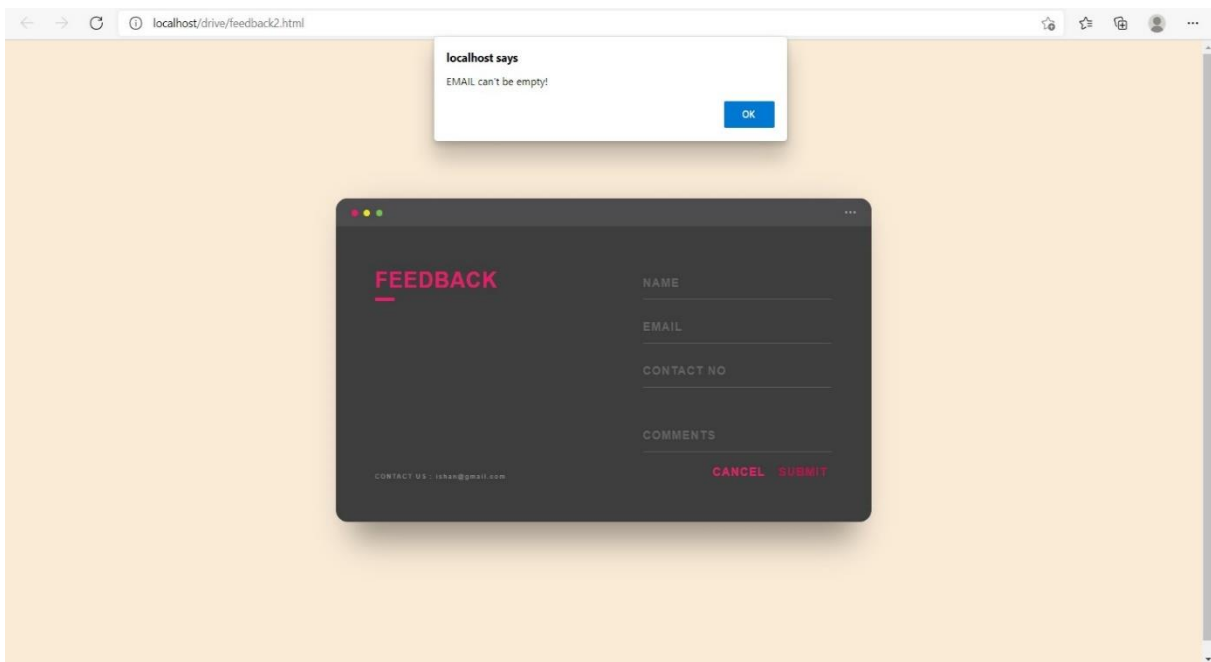

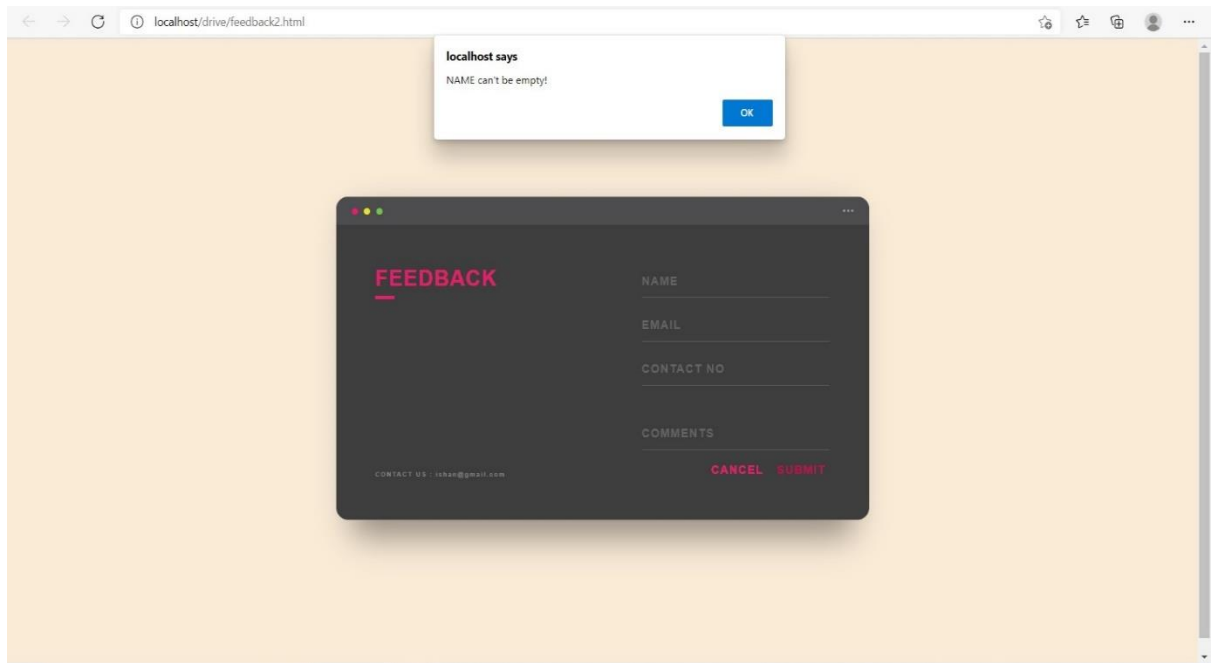

Things You Should DO	Things You Should NOT DO
 <p>Wash Your Hands Practicing Appropriate Hand Hygiene Can Prevent Respiratory Illnesses And Is Also Known To Curb The Transmission Of Viruses And Bacteria Causing Common Colds, Flu And Pneumonia. An Increase In Handwashing Among Susceptible Communities Would Potentially Help In Preventing And Controlling The Spread Of COVID-19.</p>	 <p>Avoid Close Contact With Animals Coronaviruses Are A Large Family Of Viruses. Some Coronaviruses Cause Cold-Like Illnesses In People, While Others Cause Illness In Certain Types Of Animals, Such As Cattle, Camels, And Bats. Some Coronaviruses, Such As Canine And Feline Coronaviruses, Infect Only Animals And Do Not Infect People.</p>
 <p>Always Wear A Mask Wear A Mask: Wear A Well-Fitting Three-Layer Mask, Especially When You Can't Physically Distance. Or If You're Indoors. Clean Your Hands Before Putting On And Taking Off A Mask.</p>	 <p>Avoid Close Contact With Peoples Avoid Close Contact With People Who Are Sick. If Possible, Maintain 6 Feet Between The Person Who Is Sick And Other Household Members.</p>
 <p>Stay Home During Fever Stay Home And Self-Isolate Even If You Have Minor Symptoms Such As Cough, Headache, Mild Fever, Until You Recover. Call Your Health Care Provider Or Hotline For Advice. Have Someone Bring You Supplies. If You Need To Leave Your House Or Have Someone Near You, Wear A Medical Mask To Avoid Infecting Others.</p>	 <p>Avoid Crowded Area You Can Protect Yourself By Avoiding Or Limiting Time Spent In Crowded Places, Poorly Ventilated, Indoor Locations, Keeping Physical Distancing</p>

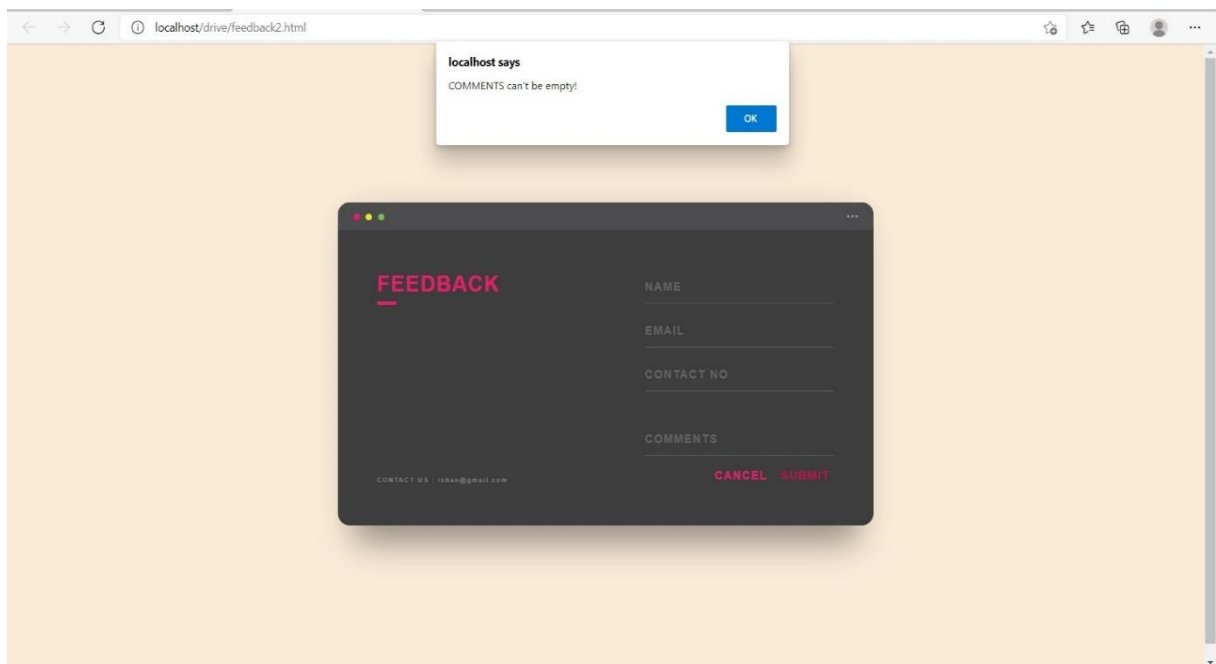

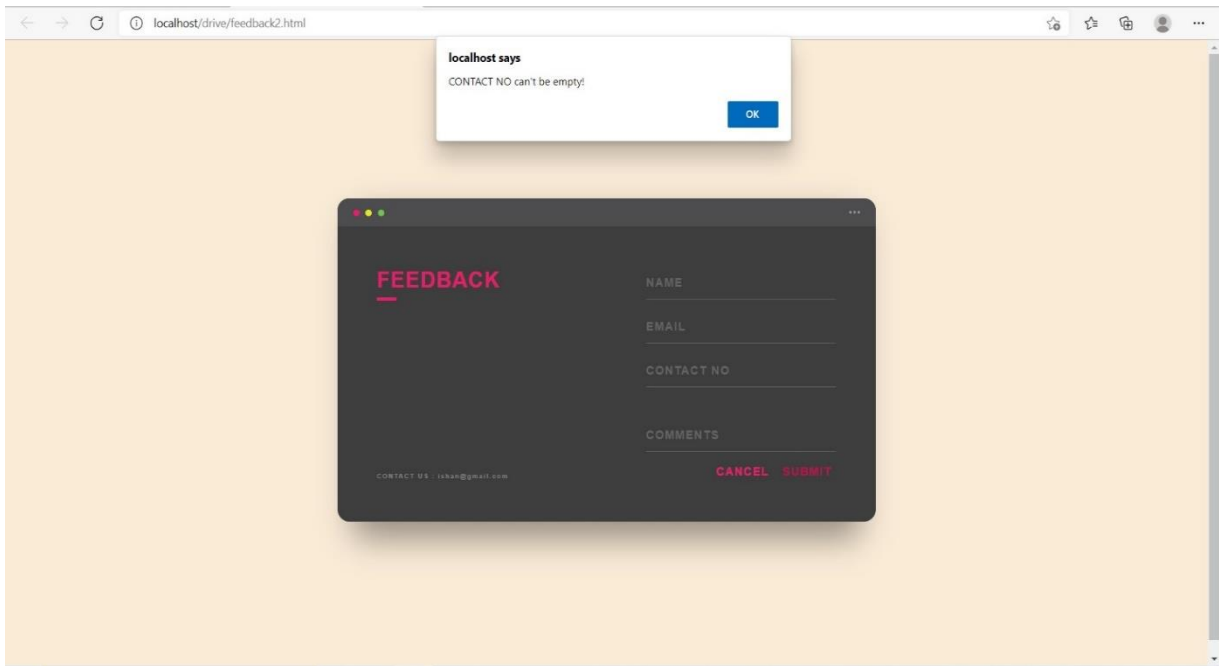

- When we click on the Covid Info option in the navigation menu , we are directed to this page which consists of articles on prevention, symptoms and precautions of Covid-19.

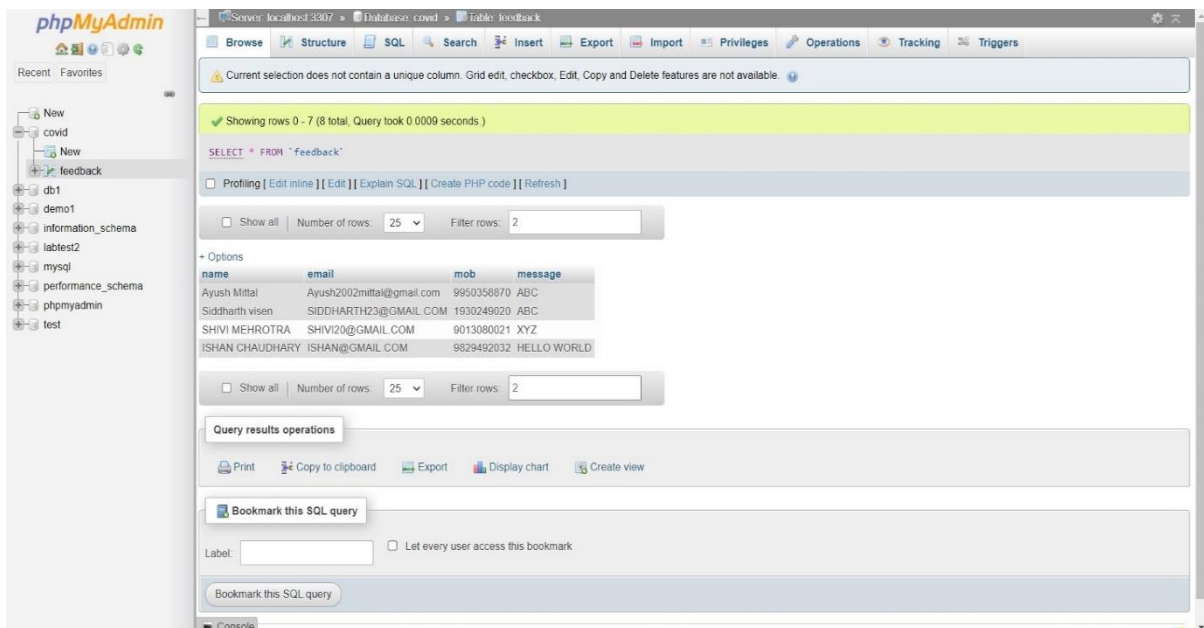

- When we click on User option in navigation bar, we are directed to a next page which contains the feedback form for the user. It contains different text fields like Name, Email, Contact Number and Comments. This form is connected to a database and all the details when filled and submitted by the user will get stored in the database.

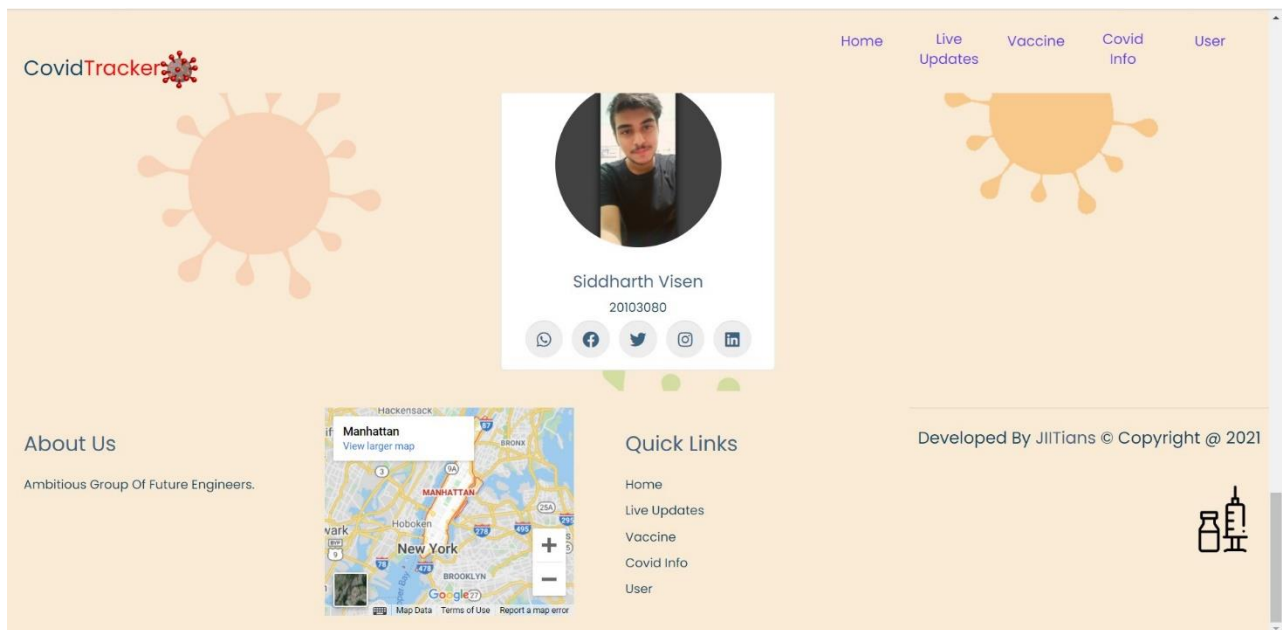

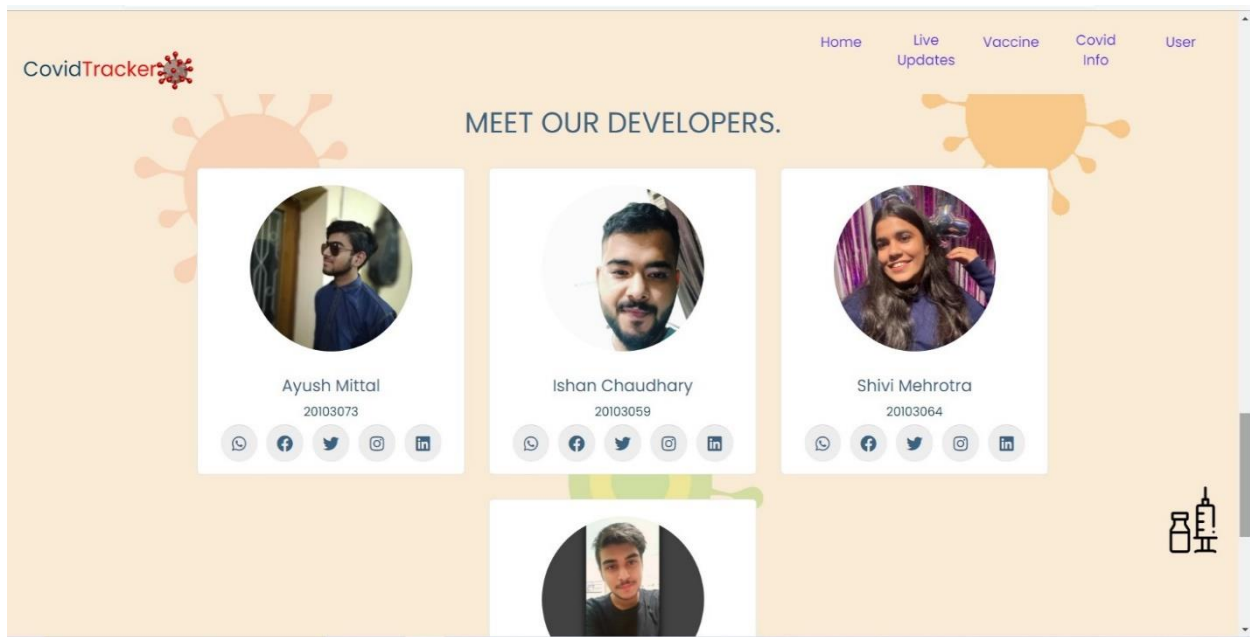

- Here, the form contains validation because of which it gives an alert if any of the fields of the form are not filled.

- Above is the image of the database named Covid that we have created to store the details entered by the user. The database contains a table called feedback containing four columns- Name, Email , Mobile No.and Message. The details are stored in this table as shown above.

- This is footer part of our Home Webpage containing the details of the team members and various useful links.

CONCLUSION

This project tells us all the necessary information regarding COVID-19. Also, it contains details regarding different vaccines used in India. The COVID-19 tracker made in this project helps us to keep the track of number of total cases in India and other countries of the world. The tracker is made using APIs for the live updation of the data. This project also contains a feedback form made with the help of PHP and MySQL for storing the details of the user.
